

SCORING SHEET

Step 1. QA-Scores

Quality Attributes (QA) [One QA per column]	Usability	Security	Availability	Performance	Maintainability
A = the number of +'s (++ counts twice)	2	2	0	3	2
B = the number of -'s (-- counts twice)	0	0	0	0	0
QA-Score (A - B) [One QA-Score per QA]	2	2	0	3	2

Step 2. Stakeholders-Score

Stakeholders	Quality Attribute (QA)	QA-Score	QA-Priority	C = QA-Score - QA-Priority
User	Usability	2	0	2
	Security	2	0	2
Owner	Availability	0	0	0
	Security	2	0	2
	Performance	3	0	3
	Maintainability	2	0	2

Is any value of C < 0? Yes ☐ No ☒ [If yes, then you lost the game]

Stakeholders-Score = Sum of C-values: **11**

Step 3. Final Score

D = Number of unaddressed concern cards [Number of concern cards that are left on the stack]: **0**

Final Score = Stakeholders-Score - D **Final Score: 11**

Range:	Result:
Less than 0	You lost the game
0 - 9	Sufficient
10 - 19	Good (Bueno) ✓
20 - 29	Very good
30 or more	Excellent
